Komma Rohith Vijay

Backend Engineer • Java, Spring Boot, Microservices • Generative AI
+91 93905 64417 | vijayrohith358@gmail.com | github.com/Rohith-vijay | linkedin.com/in/rohithvijayk
LeetCode | shanmukasaitrust.org

Education

KL University Expected May 2028
B.Tech CSE, Generative AI specialisation, Honors in Embedded Systems *CGPA 9.55 / 10*

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design
Class XII (MPC): 93% | Class X: 95%

Experience

Vice President of Technology Oct 2025 – Present
K.V.G. Shanmuka Sai Charitable Trust *Vijayawada, India*

- Sole engineer for the trust's live platform, shanmukasaitrust.org (Java 21, Spring Boot 3, React, MySQL), which runs donations, volunteers, events, CMS and reporting for 50+ members across 5 programs.
- Integrated Razorpay payments and webhooks; the platform has raised **INR 50,000+** from 40+ donors, with 80G tax-receipt PDFs generated automatically in place of manual receipting.
- Secured ∼60 REST endpoints with 5-tier RBAC, JWT in HttpOnly cookies, refresh-token rotation with reuse detection, Bucket4j rate limiting and encrypted PAN storage; 10 integration test suites and zero critical or high findings on SpotBugs and OWASP Dependency-Check.
- Deployed with Docker to Railway and Cloudflare on a custom domain, with WebSocket/STOMP notifications and Cloudinary media storage.

Projects

ByteVault Media | GitHub | Spring Boot, Spring Cloud, RabbitMQ, PostgreSQL, Docker, React Team of 3

- Marketplace for digital products built as **14 Spring Boot microservices** behind an API gateway, with Eureka discovery, OpenFeign, a PostgreSQL database per service and Docker Compose.
- Implemented the **transactional outbox** pattern so order events reach RabbitMQ even when the broker is down, and idempotent payment handling so a retried request never charges twice.
- Led the shared library, API gateway, authentication, payment and product services; the system has 51 JUnit test classes, including idempotency and outbox-retry tests.

CrediFlow | GitHub | Spring Boot, Spring Security, MySQL, React

- Loan management system for borrowers, lenders and admins, with a state-machine loan lifecycle (application, approval, repayment) across 6 entities and transactional balance updates.
- JWT and OAuth2 (Google, GitHub) login, Bucket4j rate limiting, AOP audit logging, and PDF, Excel and CSV reporting.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL, C
Backend	Spring Boot, Spring Security, Spring Cloud (Gateway, Eureka, OpenFeign), JPA/Hibernate, REST, WebSocket/STOMP
Data & Messaging	MySQL, PostgreSQL, MongoDB, RabbitMQ
Cloud & Tools	Docker, AWS, Railway, Cloudflare, Git, JUnit, Postman, SpotBugs, OWASP Dependency-Check
Frontend	React, Vite, Material UI, Tailwind CSS

Achievements & Certifications

- **LeetCode:** 155 problems solved, 119 in Java (75 Medium, 23 Hard); 100 Days Badge 2026.
- **Adobe India Hackathon 2025:** cleared Round 1, roughly 5,000 qualifiers from 2.5 lakh+ participants.
- **AWS Certified Cloud Practitioner** • NPTEL Artificial Intelligence & Machine Learning • GitHub Copilot Certification • AICTE–Google for Developers AI-ML Virtual Internship (8 weeks)
